Project: Brake Pad Partnership Representation

Description: The purpose of this project was to provide for stormwater agencies' representation in the Brake Pad Partnership – a voluntary project to address the impacts of vehicle brakes on surface waters, focusing on copper. Participation included the Brake Pad Partnership Steering Committee, which oversees all aspects of the Partnership. The scope included preparing for, participating in, and following-up Steering Committee meetings and conference calls; reviewing, commenting, and approving on behalf of BASMAA technical and administrative documents; and coordinating with the BASMAA member agencies. In FY 07/08, support for the project started to transition to other stormwater agencies in the state that are also affected by copper or metals listings and TMDLs.

FY: 00/01 through 10/11

Overseer: Monitoring Committee

Contracting Agency: BASMAA

Contractor: TDC Environmental

Budget: FY 00/01 - \$15,600 (Task of Regional Benefit); FY 01/02 through FY 02/03 - \$30,000; FY 03/04 - \$27,340; FY 04/05 - \$35,000; FY 05/06 through FY 06/07 - \$30,000; FY 07/08 - \$15,000; FY 08/09 - \$10,000; FY 10/11 - \$5,000

Status: Done

Deliverable(s): Regular update memos on Steering Committee meetings and conference calls
