- Project:** Building Materials Management Framework Guidance
- Description:** The purpose of this project was to prepare a scope of work and budget for developing an implementation framework, guidance materials, and tools for local agencies to manage PCBs-containing materials and wastes during building demolition. Preparation of this scope of work and budget was the first step in a multi-year BASMAA project to assist Municipal Regional Permit (MRP) 2.0 permittees to comply with provision C.12.f. During development of the scope of work and budget, the project team considered elements and features of the framework, guidance and tools that were discussed at a September 2015 workshop sponsored by BASMAA. Project tasks included facilitating a work group and review process, identifying barriers and opportunities to implementation, scoping development of an assessment methodology and data collection program, and scoping development of an implementation framework, guidance materials, and tools.
- FY:** 15/16
- Overseer:** Monitoring / POCs Committee
- Contracting Agency:** BASMAA
- Contractor:** EOA; LWA; TDC
- Budget:** \$25,000
- Status:** Done
- Deliverable(s):** *PCBs Material Management during Building Demolition: Outreach, Protocol, Tools, and Training – Scope of Work and Preliminary Planning Cost Estimate (December 2016)*
-
