**Project:** Flood Control Maintenance BMP Training Workshops

**Description:** The purpose of this project was to provide guidance for flood control maintenance supervisors and environmental services department staff to train their field staff in selecting, properly implementing, and maintaining best management practices for minimal threat maintenance activities. This training would fulfill, in part, the training requirements for the Regional Water Board's and U.S. Army Corps of Engineer's Regional General Permit for minimal threat flood control maintenance activities (in development). The primary training tools would be the already completed *Flood Control Facility Maintenance Best Management Practices Manual* and its accompanying *Field Guide* (see Task of Regional Benefit project - Flood Control Maintenance Best Management Practices (BMP) Manual and Reference Guide).

**FY:** 00/01

**Overseer:** Operational Permits Committee

**Contracting Agency:** Marin County Stormwater Pollution Prevention Program

**Contractor:** EOA

**Budget:** \$0

**Status:** Discontinued

**Deliverable(s):** Draft Training Outline
