Project: Mobile Cleaning Wastewater Sampling

Description: The purpose of this project was to test chemical characteristics of specific wastewaters and thus verify or suggest revisions to mobile cleaning best management practices published by BASMAA in its *Pollution from Surface Cleaning* folder. Tasks included: reviewing the surface cleaner BMPs and identifying each activity where discharge to the storm drain or sanitary sewer may be a concern, selecting activities/wastewater discharges to sample based on perceived threat to water quality, arranging to conduct activities of concern, conducting activities of concern and collecting samples, analyzing samples, interpreting the analyses, and drafting a study report.

FY: 95/96

Overseer: Executive Board

Contracting Agency: BASMAA

Contractor: Bay Area Pollution Prevention Group - Source Identification Committee

Budget: \$1,325

Status: Done

Deliverable(s): Data analysis; Technical memo (March 1998)
