Project: On-Call Services for Maintenance of RMC Monitoring Database

Description: The purpose of this project was to provide a timely and efficient means of making updates to the RMC Monitoring Database and related Excel Templates and technical assistance to RMC database users, on an as-needed basis.

In 2010, BASMAA developed the RMC Monitoring Database to store and manage SWAMP-comparable data collected in compliance with MRP 1.0 provision C.8.c (MRP 2.0 provision C.8.d). In FY 15-16, the POC Monitoring Information Management project was used to expand the database to store POC monitoring data collected per MRP 1.0 provision C.8.e and MRP 2.0 provision C.8.f. Data is entered and exported using Excel Templates that contain standardized nomenclature or look up lists. Periodically, the sampling protocols change and/or the database users desire new reporting products that require changes to the RMC database and Excel Import / Export Templates. Also, RMC database users often have questions about the database and how to use the Excel Templates.

FY: 16/17; 17/18; 18/19; 19/20

Overseer: Monitoring / POCs Committee

Contracting Agency: BASMAA

Contractor: Dan Stern Data Systems (DSDS); EOA

Budget: \$40,000

Status: Done

Deliverable(s): Updated RMC Monitoring Database and Excel Import / Export Templates
