- Project:** Qualified Post-Construction Consultants List
- Description:** The purpose of this project was to prepare a list of licensed engineers, architects, or landscape architects who are qualified to provide consulting services to builders and developers to assist in the planning, design, and specifications for post-construction stormwater treatment facilities for both maximum extent practicable and numeric standards for source control, site design and permanent treatment facilities. The consultants included on this list are deemed “qualified” to provide consulting services to meet NPDES compliance for new and re-development. BASMAA developed and issued a Request for Qualifications (RFQ) to which consultants responded with Statements of Qualifications (SOQs). BASMAA New Development Committee members reviewed all SOQs and accompanying submittal materials, and contacted references listed for consultants and may have contacted firms for further clarification of information needed to determine adequacy of qualifications provided. Based on meeting each of the submittal requirements described in the RFQ, a firm is deemed qualified and is included on the Qualified Consultant List. It is anticipated that the Qualified Consultants List will be revised by BASMAA approximately every two years, using a RFQ process.
- FY:** 04/05; 06/07
- Overseer:** New Development Committee
- Contracting Agency:** BASMAA
- Contractors:** New Development Committee
- Budget:** FY 04/05 - \$0; FY 06/07 - \$865
- Status:** Done
- Deliverable(s):** List of Qualified Post-Construction Consultants (March 2005); List of Qualified Post-Construction Consultants (February 2007)
