

B A S M A A

- Project:** Regional Construction Education Program - Phase I
- Description:** The purpose of this project was to scope out the development of a regional training program in pollution prevention practices for the construction industry, using BMPs in *Blueprint for a Clean Bay* and other contractor education pieces. The scoping effort included researching the approach and scope of training/certification programs in other regions, developing a region-wide mailing list/database of contracting firms and trade associations, working with Regional Water Board and Friends of the San Francisco Estuary staff to integrate the development of the pollution prevention element with the erosion/sediment control element of the training/certification program, forming an advisory group; and preparing a final report summarizing research and comments from the advisory group and others, and proposing a program and budget for subsequent funding and implementation.
- FY:** 97/98
- Overseer:** New Development Committee
- Contracting Agency:** Friends of the San Francisco Estuary
- Contractor:** Heather Nelson
- Budget:** \$10,000
- Status:** Done
- Deliverable(s):** Mailing list/database; *Regional Construction Education Program: Phase I Final Project Report* (February 1998)
