**Legend**

training or experience not listed

Qualified Consultants provided: proof of staff training in post-construction stormwater treatment facility design and installation; a statement of understanding of groundwater protection principles; a statement of understanding of urban stormwater management practices, issues, and requirements; information on examples of three stormwater management plans that the firm has developed within the past five years, including, type of project, size, location, a detailed description of BMPs used; a statement summarizing the overall interest, availability, and commitment of the firm for inclusion on the BASMAA Qualified Consultant List.

Disclaimer: BASMAA provides this list of qualified consultants for the use of its member agencies. Consultants are listed based on a review of their general qualifications and experience. Therefore, users of the BASMAA Qualified Consultant List must make the final determination as to the applicability of the information on the list to any general or specific use. Users of the BASMAA Qualified Consultant List assume all liability directly or indirectly arising from use of the BASMAA Qualified Consultant List.

The listing of any consultant on the BASMAA Qualified Consultant List is not to be construed as an actual or implied endorsement, recommendation, or warranty of such consultant, nor is criticism implied of similar consultants that are not listed.

This disclaimer is applicable whether information from the BASMAA Qualified Consultant List is obtained in hard copy form or downloaded from the Internet.
