Project: BMP Effectiveness Monitoring Guidance

Description: The purpose of this project was to develop guidance on monitoring the effectiveness of post-construction BMPs in order to increase the usefulness and transferability of monitoring studies' results to other locations and programs. The guidance includes recommended monitoring techniques and parameters for various types of BMPs and effectiveness issues (e.g., pollutant removal, maintenance) that should be addressed. BASMAA agencies are encouraged to use the guidance document when designing special studies of best management practices.

FY: 95/96

Overseer: Monitoring and New Development Committee joint BMP Monitoring Work Group

Contracting Agency: BASMAA (Fiduciary Agent – Santa Clara Valley Water District)

Contractor: EOA

Budget: \$10,000

Status: Done

Deliverable(s): *Guidance for Monitoring the Effectiveness of Stormwater Treatment Best Management Practices (August 1996)*
