- Project:** Brake Pad Partnership – Support for Sustainable Conservation
- Description:** The purpose of this project was to support the management, coordination, and facilitation of the Brake Pad Partnership. This purpose was in contrast to that of the other Brake Pad Partnership project BASMAA has funded, which was focused on representing BASMAA’s interests on the Steering Committee. Sustainable Conservation’s overarching role in producing BPP products is to provide a coordinated, agreed-on approach to addressing the issue of copper in urban runoff and to propel the BPP through the identification of technical work needed, the conduct of the work itself, and the joint evaluation of the results. Sustainable Conservation also provides all of the necessary scheduling and logistical support for convening meetings of the Steering Committee and for holding the Annual Stakeholder Conference. In FY 06/07, support for the project started to transition to other organizations, including stormwater agencies in the state that are also affected by copper or metals listings and TMDLs.
- FY:** 01/02 through 05/06
- Overseer:** Monitoring Committee
- Contracting Agency:** BASMAA
- Contractor:** Sustainable Conservation
- Budget:** FY 01 /02 - \$10,000; FY 02/03 through FY 04/05 - \$25,000; FY 05/06 - \$20,000
- Status:** Done
- Deliverable(s):** Annual Stakeholder Conferences - Agendas (2000, 2001, 2002, 2004, 2005); *Brake Pad Partnership Updates* (2001, 2005, 2006); *Copper Use Monitoring Program Results for Model Years 1998, 1999, and 2000* (December 2001); *Copper Use Monitoring Program Results for Model Years 1998 – 2001* (February 2003); *Copper Use Monitoring Program Results for Model Years 1998 – 2002* (January 2004); *Copper Use Monitoring Program Results for Model Years 1998 – 2004* (January 2006); *Copper Use Monitoring Program Results for Model Years 1998 – 2005* (December 2006)
