

B A S M A A

- Project:** Dewatering Confluence: Information Sharing Workshop and BMP Update
- Description:** The purpose of this project was to conduct a focus group in order to open a dialogue among regulators and contractors on dewatering issues and practices to allow:
- Regional Water Board and other regulatory staff to explain and illustrate the importance of proper dewatering activities to contractors and flood control staff and
 - contractors and flood control staff a forum to introduce new, effective methods for dewatering (1) nuisance water and (2) in-stream diversion water to regulatory staff.
- The results of the focus group were to be distributed as a technical memorandum and incorporated into BASMAA's *Flood Control Facility Maintenance Best Management Practices Manual* and its accompanying *Field Guide*, as appropriate.
- FY:** 00/01
- Overseer:** Operational Permits Committee
- Contracting Agency:** Contra Costa County Public Works Department
- Contractor:** Essex Environmental
- Budget:** \$5,980
- Status:** Discontinued; tasks integrated into the FishNet 4C maintenance manual
- Deliverable(s):** Proposed Work Plan; Draft Workshop Agenda
